

## CampusRide Sharing Need & Analysis Report

This document serves as a preliminary needs and analysis report for introducing a cab-sharing system within the campus. The goal is to understand commuting patterns, identify peak travel hours, and assess the feasibility of a shared mobility platform to promote cost-effective and eco-friendly transportation among students and staff.

### Objective

- To analyze the current transportation needs of campus members.
- To promote sustainable and affordable travel solutions.
- To create a platform connecting individuals with similar travel routes and timings.

### Proposed Initiative

The proposed ride-sharing service will allow students and faculty to coordinate rides within or outside campus areas, reducing travel costs and congestion. The system will feature request forms, driver verification, and shared route listings.
